**Notes:** \* The préces are either direct citations of key thematic phrases from the Psalms/Canticles or are brief thematic summaries. Of the 42 possibilities 11 (25%) show direct correspondence between *OLM* and *RCL* (though *OLM* often chooses certain verses). The overall thematic correspondence of both is, however, supportive of the eschatological themes of the readings as detailed in Appendix 1 and 2. \*\* The complementary track of the *RCL* for the first 3 weeks of an expanded Advent is followed above as those weeks are taken from the end of the season after Pentecost. This is because an expanded Advent does not need to feature a semi-continuous or complementary track of lections and Psalms/Canticles.
